“B” Series
Automatic Rotary Ring Stretch Wrapper

• Fast Yet Affordable
Wraps up to 100 loads per hour depending on load size and wrap pattern

• Proven Construction
Minimizes Maintenance
Durable aluminum frame structure along with a well balanced ring and belted lifting device results in quiet, efficient performance and minimal maintenance

• Simple Installation
Saves Time, Money and Space
Requires minimal assembly and less floor space compared to most other styles of wrappers

• Extremely Versatile
Modular Design to Meet Changing Demands
Accommodates a wide range of pallet load sizes and is offered with numerous innovative options

• Film Savings and Unmatched Flexibility
Advanced Easy S film carriage ensures a higher, more consistent pre-stretch while the ring design allows for unlimited wrap patterns and reduced film usage

Shown with optional Tail Tucker and LogoWrap™ carriage.

The unique and original Octopus ring wrapper has been upgraded to incorporate the latest technology. It is fast, efficient and versatile.

Octopus features
- Medium to high speed wrapping loaded with features
- Superior tension control allows for customized wrapping
- Easy S film carriage design offers unmatched performance

The OCTOPUS aluminum frame version is a fully automatic pallet wrapping machine incorporating the latest technology and the famous OCTOPUS ring type method. The wrapping film reel is suspended from a ring and it revolves around the pallet. The ring is raised and lowered according to the wrapping program. The pallet remains stationary, which makes the wrapping of unstable and “lightweight” products considerably easier. There are no centrifugal forces to cause stress or strain on the load or on the equipment. As the ring can be accurately positioned in the vertical direction, wrapping can be started and finished at any height required. The OCTOPUS provides optimal load containment while minimizing film usage.

Options
- Load stabilizer ensures unstable loads remain intact throughout the wrapping operation.
- Integrated top sheet dispenser provides automatic weather proofing without taking up floor space.
- No Touch-No Tail (NT²) Seamer offers high quality, low maintenance seaming without touching the pallet.
- Corner Post Device (CPD) cost saving system that automatically inserts 4 solid corner posts at the pallet corners.
- LogoWrap™ System automatically inserts printed stretch film to a pallet load during the normal wrapping cycle to provide affordable 4-sided brand identification.
- OctoMax™ performance monitoring system reduces film costs, eliminates downtime and simplifies maintenance.
- And many more . . .
