Roll Change System (RCS)

The Automatic Roll Change System (RCS) can be a useful, labor savings option for those customers desiring less operator interaction with the stretch wrapper.

The RCS also can minimize downtime associated with film roll changes, thus increasing production efficiency.

The system can be equipped with up to 5 extra film carriages.

- Ideal for higher speed application
- Increased operator safety
- Film rolls can be replenished at any time, including during the machine cycle, minimizing downtime
